

As technologies advance and legacy systems move to the cloud or are delivered as a service, NetCentrics helps customers manage legacy systems (O&M) and prepare for and manage transitions to infrastructure, platform and software services (IaaS, PaaS, SaaS) based on IT Service Management (ITSM) best practices. We help design and implement software defined networks and storage (SDN and SDS) as well as improving enterprise performance management applications. All of these capabilities provide for the optimal NetOps delivery.

We provide the following Infrastructure and Cloud services:

■ Enterprise IT Management

NetCentrics has managed large enterprise IT systems and data centers for WHS, EITSD, JSP and other agencies. We have extensive experience managing all of the operations and maintenance for mission critical systems

- **Network Operations Security Center (NOSC)**
- **Technology Refresh**
- **Continuous improvement**

■ Virtualization / Software Defined

NetCentrics has deep expertise in designing and implementing software defined networks and storage. We also have extensive experience in virtual desktop infrastructure (VDI).

- **Hyperconverged Infrastructure (HCI)**
- **Software Defined Storage**
- **Infrastructure as code**

■ Consolidation

Legacy data centers will consolidate and migrate to the cloud. NetCentrics has the experience to guide your teams through migration, modernization, migration and consolidation. We have over 15 years of data center consolidation experience, starting with IMCEN, WHS/OSD EITSD and the Pentagon JSP.

- **Enterprise IT Consolidation**
- **Change management for users**

■ Infrastructure and Platform Services

Cloud solutions aren't simply focused on software. Many vendors offer infrastructure and platforms "as a service" (IaaS, PaaS). We can help you design the best approach for your organization and manage the transition.

- **Optimizing infrastructure services**
- **Designing and implementing platform services**
- **NetOps**

■ Enterprise Performance Management

NetCentrics leads the way in developing enterprise performance solutions and metrics to ensure your systems are operating at peak performance.

- **Providing integrated, real time visibility to all end points across the enterprise**
- **Out of Band (OOB) network management**
- **Cyber Scorecard**
